Three similarity metrics per adapter (all task types)
dolly, 4 nodes, task skew α=0.1
Node 4 (closed_qa, summarization), round 3
All adapters merged (average)
Node 3 (general_qa, brainstorming, information_extraction), round 3
Node 4 (closed_qa, summarization) [aggregated], round 3
Node 2 (classification) [aggregated], round 3
Node 3 (general_qa, brainstorming, information_extraction) [aggregated], round 3
Node 2 (classification), round 3
Node 1 (open_qa), round 3
Node 1 (open_qa) [aggregated], round 3
